

Citation Advantage of Open Access Articles

Eysenbach (2006) demonstrates that articles published as an immediate OA article on the journal site have higher impact than self-archived or otherwise openly accessible OA articles. He found strong evidence that, even in a journal that is widely available in research libraries, OA articles are more immediately recognized and cited by peers than non-OA articles published in the same journal. OA is likely to benefit science by accelerating dissemination and uptake of research findings.
